SUBJECT

Estate of Mr R. Example

PREPARED FOR

Example & Partners LLP, for the executors

REPORT

LB-2026-0061

DATE

22 Sep 2026

CONCLUSION

The estate held cryptoassets worth GBP 147,900 at the date of death across seven wallets and two exchange accounts. Three of the wallets were not known to the family.

Mr Example's holdings were mostly bitcoin and ether kept in a hardware wallet, plus a lending-protocol position that does not appear as a wallet balance. Control has been evidenced for six of the seven wallets from the recovered hardware wallet; the seventh is a browser wallet whose keys have not been found. Nothing left any wallet after the date of death. Values are at market prices on 14 February 2026, converted at the Bank of England rate for the day.

8 Limits

This statement covers the wallets and accounts identified above. A wallet that no declared wallet ever transacted with cannot be found from the chain. Exchange balances are taken from the exchange's own statement. Valuations use market prices at the date and the stated sources; another source may give a different figure, and whether a valuation is accepted for inheritance tax or by a court is for the executors' professional advisers. The statement does not evidence control of wallet 0xe3307b. It is not legal or tax advice.
